We thank you for your support and encouragement for the students who participate in the Kentucky NEED and the Kentucky Green & Healthy Schools programs. To have an environmentally friendly Kentucky with wise energy decision makers we must continue to encourage students, their schools, families and communities to consider the decisions they make on a daily basis. Our goal is to educate students and to empower them to share their knowledge with others.

Special Note:

The Green & Healthy School certificates are mounted on reclaimed circuit boards. The plaques are made of recycled wood with a portion of the profits going to water education/conservation in Africa. The banners and flags are made of recycled pop bottles.
